

GIS PUBLICATIONS TEAM SERVICES

The goal of the GIS Publications Team is to provide application and process documentation that is accurate, up to date, and accessible to all Mobil employees and contractors. We offer the services outlined in this brochure to help you and your project team determine the best approach and delivery methods for your documentation.

Program Vision

To become the center of excellence for the development, implementation, and maintenance of documentation standards and strategies

Beth Bailey

ELBAILEY - DALLAS

BM 322-5072

Arrange for technical writers to create end-user, system, and other technical documentation.

-  Collect information from you regarding the scope of your project and provide you with a technical writer(s) with the necessary skill set to best meet your needs.
-  Relieve you and your staff of technical writing and documentation functions so you can focus on managing your core business.
-  Monitor the progress of the publications as technical writers work with your project teams.
-  Align ourselves with publication partners who compliment the GIS Publications Team services to provide an efficient network of writers capable of meeting your communication objectives.

Provide advice regarding documentation upgrades, conversion or creation.

-  Evaluate the usability of your paper and online documentation as it relates to your users, the tasks they need to perform, and their motivation for accessing the information.
-  Consult with you regarding documentation delivery. Determine whether paper, online or both medias are necessary.
-  Evaluate documentation content, format, and organization. Make recommendations and changes if necessary.
-  Provide documentation project review and editorial services to members of the Publications Team who are a part of your project.

Develop training strategies and materials to accompany your application project.

-  Determine best training strategies and methodologies including, but not limited to, Computer Based Training, Stand-up Training, and Quick Reference Cards.
-  Analyze effectiveness of existing training programs.
-  Consult with you regarding training communication and delivery.
-  Assist with storyboard presentation and interpretation. Provide storyboard review and editorial services.

Provide the skills to meet your specific documentation needs.

System documentation
